

Option 1: Student Progress

Here's one possible intervention strategy:

1. Arrange a one-on-one meeting with each of the five lagging students to learn about their challenges and any roadblocks they are encountering.
2. Determine the most important task that each of the five students must complete in order to get back on track, and establish clear deadlines and expectations. Provide extra resources or assistance to assist them in completing the task, such as extra tutoring sessions or access to relevant materials.
3. Check in with each of the five students on a regular basis to monitor their progress and provide encouragement and support along the way.
4. Arrange a group check-in session with the 10 at-risk students to go over their next task and ensure they have the resources and support they need to complete it successfully. If necessary, provide additional assistance.
5. Offer additional challenging projects or opportunities to expand their learning to the five students who are ahead of schedule to help them continue to grow and develop their skills.
6. Regularly monitor the progress of all 20 students and provide feedback and support as needed to keep them on track and achieve their objectives.
7. Consider rewarding or recognizing students who successfully complete their tasks and stay on track in order to motivate and encourage them to keep up the good work.
